# INTRODUCTION

This report contains a summary of the Vital Statistics of the State of Maine for the calendar year of 1979. Births are tabulated for each county and all minor civil divisions and deaths are tabulated for each county and 45 selected minor civil divisions.

## ALLOCATION OF VITAL EVENTS

The statistics on births in this report refer to residents of Maine only, regardless of whether or not the birth actually occurred in Maine. With the exceptions of Tables 3 and 9, death statistics also refer to residents of Maine only. Except for Table 18, statistics on marriages include non-residents as well as residents of Maine, who marry in the State. All statistics on divorces include non-residents as well as residents who are divorced in Maine.

Births are allocated to the usual residence of the mother and deaths to the usual residence of the deceased. This information is obtained for the certificate by the physician, hospital record librarian, funeral director, or other person responsible for completing the certificate of birth or death. The practice of allocating births and deaths to usual place of residence was initiated in 1935. This method of allocation is made possible by the exchange of transcripts of non-resident births and deaths with other states and Canada.

All occurrence data for marriages and divorces are distributed to the place in Maine where the marriage ceremony was performed or where the divorce decree was granted, rather than the place of residence.

## FACTORS AFFECTING ACCURACY

Several factors may produce certain slight inaccuracies in this report. Some of the more important of these factors are outlined below:

(1) Completeness of Registration: A birth certificate test conducted in 1950 indicated that about one percent of births in Maine are not recorded. In addition to unrecorded vital events, others may not be included in this report by reason of failure of the person required to report the event to make a timely report, or failure of a municipal clerk to make a timely report to the State Registrar, or failure of other states to make timely exchanges of nonresident transcripts of births and deaths.

(2) Errors in Data: Data in this report are based upon original certificates of births and deaths, copies of original certificates of marriages prepared by city and town clerks, and abstracts of decrees of divorces prepared by the clerks of courts. Errors in data may be introduced by persons giving information for the original certificate, persons involved in the actual preparation of the original certificate, persons involved in the preparation of the copies or abstracts of the original certificates, or persons involved in coding and computer processing of the data.

POPULATION ESTIMATES

The estimates of county populations on July 1, 1979 which appear in this report, are intercensal estimates prepared by the State of Maine, Division of Research and Vital Records of the Department of Human Services. These county estimates are based on the assumption that the net migration between 4/1/70 and 7/1/79 is equal to .925 times the total net migration for the decade ending 4/1/80.

## MORTALITY CLASSIFICATION

The mortality classification, used in this report, is the 9th Revision of the International Statistical Classification, consisting of a list of 722 categories of diseases and morbid conditions, plus 192 categories for classification of the external cause of injury, and 190 categories for the characterization of injuries according to the nature of lesion.

Under the 9th Revision, the method for selecting the cause of death for statistical purposes remained the same as the method under the 8th Revision. The 8th Revision, introduced in 1949, instituted a method whereby the physician in attendance at death indicates the disease or morbid condition which he considers to be the underlying cause of death. The underlying cause is defined as "(a) the disease or injury which initiated the train of events leading directly to death, or (b) the circumstances of the accident which produced fatal injury."

Two abridged lists of causes of death are presented in this report. Deaths by selected age groups are tabulated in an abridged list of 282 causes and deaths by residence are tabulated in an abridged list of 72 causes.

## RATES

Birth rates and crude mortality rates, unless otherwise specified, are expressed as the number of births or deaths per 1,000 population. Mortality rates attributed to specific diseases are expressed as the number of deaths per 100,000 population. Infant mortality rates are expressed as the number of deaths per 1,000 live births. Maternal mortality rates are expressed as the number of deaths per 10,000 live births.

## POPULATION

The population of Maine was estimated to be 1,114,128 on July 1, 1979. This is a net gain in population of 120,406 or 12.1 percent more than the number of inhabitants enumerated in the 1970 U. S. Census report. Total civilian population was estimated to be 1,102,129 on July 1, 1979. This is a net gain of 12.3 percent in civilian population since April 1, 1970. The natural increase in total population between April 1, 1970 and July 1, 1979 was 51,719 and the estimated net inward migration was 68,687.

TABLE 1
ESTIMATED POPULATION BY COUNTIES
MAINE, JULY 1, 1979 AND
PERCENT OF CHANGE SINCE 1970

| COUNTY | ESTIMATED POPULATION | PERCENT CHANGE |
|---|---|---|
| STATE | 1,114,128 | + 12.1 |
| ANDROSCOGGIN | 98,991 | + 8.4 |
| AROOSTOOK | 91,521 | - 2.7 |
| CUMBERLAND | 213,943 | + 11.1 |
| FRANKLIN | 26,686 | + 18.9 |
| HANCOCK | 41,193 | + 19.1 |
| KENNEBEC | 108,651 | + 14.0 |
| KNOX | 32,658 | + 12.6 |
| LINCOLN | 25,213 | + 22.8 |
| OXFORD | 48,563 | + 11.7 |
| PENOBSCOT | 136,237 | + 8.6 |
| PISCATAQUIS | 17,519 | + 7.6 |
| SAGADAHOC | 28,308 | + 20.7 |
| SOMERSET | 44,667 | + 10.0 |
| WALDO | 28,053 | + 20.3 |
| WASHINGTON | 34,515 | + 15.6 |
| YORK | 137,410 | + 23.2 |

## LIVE BIRTHS

There were 16,435 resident live births registered in Maine in 1979. The number of live births increased 3.2 percent from 1978, and the birth rate increased 0.7 percent, to 14.8 per 1000 population.

### SEX

The number of male live births was 8,468 and the number of female live births was 7,967. The sex ratio of live births was 106.3 male live births for every 100.0 female live births.

### PLURAL BIRTHS

In 1979, there were 335 children born alive in plural births.

### RACE

Only 1.6 percent of all resident live births in 1979 were nonwhite. The total number of nonwhite births in 1979 was 264. This is an increase of 3.5 percent from the number of resident nonwhite live births in 1978. This increase in nonwhite births was peculiar to American Indians, while Negroes decreased and other nonwhite races showed little change.

The largest nonwhite group was American Indian, who gave birth to 87 live born children. Negroes gave birth to 76, and persons of other nonwhite races gave birth to 101 live born children.

### LEGITIMACY

There were 2,083 illegitimate births to mothers who were Maine residents in 1979. Illegitimate live births represented 12.7 percent of all resident live births. With the exception of 1971, the percent of births that are illegitimate has increased in every year since 1960.

## HOSPITAL BIRTHS

The number of resident live births in hospitals in 1979 was 16,171 or 98.4 percent of all resident live births.

## TERMINATIONS OF PREGNANCY

Due to the passage of a State law prohibiting the reporting of residence on abortion reports, we do not have resident counts of terminations of pregnancy. The total number of terminations of pregnancy reported as occuring in Maine in 1979 was 4,319, of which 120 were fetal deaths, 236 were spontaneous abortions and 3,963 were induced abortions. This is a decrease of 3.3 percent in the number of terminations of pregnancy reported in 1978.

The following table shows a distribution of terminations of pregnancy occurring in Maine by type of termination by length of gestation.

TERMINATIONS OF PREGNANCY BY LENGTH OF GESTATION
MAINE 1979

| Gestation in weeks | FETAL DEATHS | | ABORTIONS | |
|---|---|---|---|---|
| | Other | Spontaneous Abortions | Spontaneous | Induced |
| Total | 120 | 3 | 233 | 3,963 |
| Under 13 weeks | 0 | 0 | 108 | 3,632 |
| 13 - 19 weeks | 5 | 0 | 23 | 79 |
| 20 - 27 weeks | 21 | 0 | 6 | 2 |
| 28 weeks and over | 45 | 0 | 0 | 0 |
| Not reported | 49 | 3 | 96 | 250 |

## GENERAL MORTALITY

There were 10,278 deaths of Maine residents in 1979. The crude mortality rate was 9.2 per 1000 population, a decrease of 1.1 percent from 1978.

SEX

In 1979 the number of resident male deaths was 5,488 and the number of resident female deaths was 4,790. The estimated death rate among males was 10.1 per 1,000 male population and among females was 8.4 per 1,000 female population.

INFANT DEATHS

There were 160 infant deaths in Maine during 1979 and the infant death mortality rate was 9.7 per 1,000 live births. This was a 1.2 percent decrease in number from 1978 and 4.9 percent decrease in rate. The infant mortality rate has decreased 53.6 percent since 1970, 61.5 percent since 1960, 68.9 percent since 1950, and 81.7 percent since 1940.

There were 96 neonatal deaths (infant deaths during the first four weeks of life) in 1979 and the neonatal mortality rate was 5.8 per 1,000 live births. This was a decrease in number of 3.3 percent since 1978.

## PERINATAL MORTALITY

The estimated perinatal mortality rate in 1979 was 13.4 perinatal deaths per 1,000 live births and terminations of pregnancy of twenty weeks or more gestation.

The perinatal mortality rate is based on the following formula:

$$\frac{\text{Terminations of pregnancy 20 weeks or more + neonatal deaths}}{\text{Total live births + terminations of pregnancy 20 weeks or more}} \times 1000$$

The 1979 perinatal mortality rate is based on 126 estimated terminations of pregnancy of 20 or more weeks gestation and 96 neonatal deaths.

## MATERNAL MORTALITY

There were two maternal deaths in Maine in 1979.

## MARRIAGES

There were 11,918 marriages occurring in Maine in 1979. Of this number, 11,208 or 94.0 percent were marriages in which the bride and/or the groom were residents of Maine. The occurrence marriage rate was 10.7 per 1,000 population, the same as in 1978.

There were 11,001 resident brides in 1979, of which 73.2 percent were natives of Maine. There were 10,601 resident grooms of which 72.0 percent were natives of Maine. About 26.6 percent of the resident brides, and 11.2 percent of the resident grooms were under 20 years of age. About 65.7 percent of the resident brides were married for the first time and 64.5 percent of the resident grooms were married for the first time.

Civil ceremonies were performed in 37.8 percent of the resident marriages in 1979. There were 167 resident mixed marriages in 1979, an increase of 23.7 percent over last year.

## DIVORCES AND ANNULMENTS

There were 6,158 divorces granted in Maine during the calendar year 1979. This was 6 less than the number of divorces granted in 1978. The crude divorce rate was 5.5 per 1,000 population. There were 12 marriages annulled in 1979.

### PLAINTIFF

The wife was the plaintiff in 53.8 percent of the divorces, and the husband in 17.7 percent and 28.5 percent were cross suits.

### LEGAL GROUNDS FOR DECREE

Cruelty was the legal grounds for decree in 18.4 percent of all divorces granted in Maine in 1979. Cruelty includes "cruel and abusive treatment" and "extreme cruelty". Differences was legal grounds for decree in 81.1 percent of the divorces. This is a significant change from last year in which 47.3 percent were cruelty and 51.6 percent were differences.

DURATION OF MARRIAGE

The median duration of marriage before divorce in 1979 was 6.4 years. The third year of marriage was the peak year during which marriages were ended by divorce.

MINOR CHILDREN

The divorced couple had one or more minor children in 3,635 or 58.9 percent of 1979 divorces. Sixteen divorced couples had 6 or more minor children.

LEADING CAUSES OF DEATH

In table 7, "Life Lost" is based on expectation of life from a 1977 United States Life table for white population. The death of an infant represents a total of 73.8 years of life lost. The death of a 50 year old person represents 27.7 years of life lost and the death of a 90 year old person represents 3.1 years of life lost.

When one examines the leading causes of death in terms of "Life Lost" rather than total deaths, an entirely different picture is presented. "Certain Conditions Originating in Perinatal Period", which caused only 0.6 percent of total deaths caused 3.0 percent of total "Life Lost" in 1979, and jumped from 14th place in total deaths to 9th place in total life lost. "Congenital Anomalies" which was in 12th place in total deaths, was in 8th place in total "Life Lost". Death from "Suicide" was in 10th place in total deaths but in 7th place in total "Life Lost". The most prominent shift in the other direction was arteriosclerosis which was in 7th place in total deaths and in 12th place in total "Life Lost".

The "Life Lost" rates for "Chronic Obstructive Lung Disease", "Atherosclerosis", "Congenital Anomalies", and "Accidents" increased over 1978 by 75.0 percent, 33.3 percent, 26.9 percent, and 10.2 percent respectively.

The large increase in the amount of life lost due to "Chronic Obstructive Lung Disease" is primarily due to a change in the mortality classification system. In the 9th revision of the International Classification of Diseases this classification was changed to include mortality from "Bronchitis, Emphysema and Asthma".

The largest decrease in "Life Lost" was "Pneumonia and Influenza", which decreased by 40.0 percent from 1978.

## ACCIDENTS

Accidents occurring in Maine in 1979, accounted for 542 deaths. Of these accidents, 45.0 percent happened on Maine's street and highways and 21.0 percent happened at home. In 5.5 percent of the accidents, the victim was considered to be working at the time of occurrence.

The state death rate for accidents, occurring in Maine, was 48.6 deaths per 100,000 population. Knox and Oxford Counties had significantly higher rates in 1979 than the State.

TABLE 3

DEATHS FROM ACCIDENTS OCCURRING IN MAINE, BY COUNTY OF ACCIDENT AND BY PLACE OF ACCIDENT. MAINE, 1979
